### Key Terms

**Allocated Tips:** Tips an employer assigns to an employee. They are in addition to the tips the employee reports to the employer.

**First-time Homebuyer Credit:** The first-time homebuyer credit is a maximum of \$8,000 (\$4,000 for Married Filing Separately). This is a refundable credit, which means that even if the taxpayer does not owe any tax, the money will be refunded to the taxpayer. There are payback provisions if the home was sold within a 36-month period.

**Individual Retirement Arrangement (IRA):** A tax-sheltered savings plan set up by the taxpayer, generally for retirement income.

**Nonrefundable Credit:** A nonrefundable credit can only reduce the tax liability to zero. Any excess credit is not refunded to the taxpayer.

**Pension:** A series of definitely determinable payments made to an employee or survivor (the beneficiary of a deceased employee's pension) after the employee retires from work.

**Self-employment Income:** Earned income from a trade, business, farming, or profession that is not paid by an employer. For example, hair stylists and lawn care workers who work for themselves (and not for someone else) are considered self-employed.

**Tip Income:** Money and goods received for services performed by food servers, baggage handlers, hairdressers, and others. Tips go beyond the stated amount of the bill and are given voluntarily.

**Traditional IRA:** An individual retirement arrangement that is not a Roth IRA or a SIMPLE IRA.

Unreported Tip  
Income

**Discuss** the definition of allocated tips and how they are included on Form W-2.

**Answer:** \$20 per month or more.

**Refer** students to Pub 17 for more information.

**Refer** to Pub 4012 for discussion of figuring the tax.

**Point out** that TaxSlayer uses info from Form W-2 to compute the correct tax on unreported tips.

**Review** Tax Tip on tip income found on [taxmap.ntis.gov](http://taxmap.ntis.gov).

**Demonstrate** TaxSlayer entries required for the calculation of taxes on unreported tip income.
