### Standard Deduction and Tax Computation

Time Required: 15-45 minutes

Introduction	Objectives	Topics
This is the first of eight lessons that cover the Tax and Credits section of the return. This lesson teaches students how to subtract the appropriate standard deduction from taxpayers' adjusted gross income to figure their taxable income.	<p>Determine the standard deduction amount for most taxpayers.</p> <p>Determine the standard deduction amount for taxpayers claimed as dependents.</p> <p>Identify how taxable income and income tax are computed and reported.</p>	  <p>Deductions</p> <p>Age and Blindness</p> <p>Taxpayers who can be Claimed as Dependents</p> <p>Standard Deduction vs. Itemizing</p> <p>Determining Taxable Income and Tax</p> <p>Kiddie Tax</p> <p>Qualified Business Income (QBI)</p>

### Key Terms

**Adjusted Gross Income (AGI):** The taxpayer's total adjusted gross income (AGI) is the amount that is used to compute some limitations, such as the medical and dental deduction on Schedule A and the credit for child and dependent care expenses.

**Exemptions (Personal or Dependency):** Amount that taxpayers can claim for themselves, their spouses, and eligible dependents. The total is subtracted from adjusted gross income before tax is figured on the remaining income (taxable income).

**Itemized Deduction:** Itemized deductions allow taxpayers to reduce their taxable income based on specific personal expenses. If the total itemized deductions are greater than the standard deduction, it will result in a lower taxable income and lower tax.

**Kiddie Tax:** For children under age 18 and certain older children, unearned income over a certain amount is taxed using the tax rates applicable to trusts and estates.

**Married Filing Jointly:** Filing status for taxpayers who are married to each other or live together in a common law marriage and combine their income and deductions on the same tax return. The status also applies to taxpayers who are separated but not divorced and to taxpayers whose spouse died during the tax year and has not remarried, as long as one tax return is used for both individuals.

**Married Filing Separately:** Filing status for taxpayers who are married to each other or live together in a common law marriage and report their own incomes and deductions on separate returns.

**Qualified Business Income (QBI):** For taxable years beginning after December 31, 2017 and before January 1, 2026, there is a deduction for "pass through" businesses. Sole proprietors are categorized as "pass through" businesses.

**Standard Deduction:** An amount, provided by law and based on filing status, age, blindness, and dependency that taxpayers can deduct from their adjusted gross income before tax is determined.

Qualified Business Income (QBI)	<p><b>Discuss</b> For taxable years beginning after December 31, 2017 and before January 1, 2026, there is a deduction for "pass through" businesses. Determining Taxable Income and Tax	<p><b>Emphasize</b> that the amounts for taxable income, AGI, and the standard or itemized deductions play an important role in determining the taxpayer's tax liability, and diligent care should be taken to ensure that they be figured correctly.</p> <p><b>Point out</b> that the tax is automatically calculated based on previous entries. It is important to enter all income, deduction, and credit information correctly for the tax to be computed accurately. The tax software also calculates the exemption amount and applies any limitations in determining the tax.</p> <p><b>Demo</b> the tax software using an example with Form 1040 entries.</p>	<p><b>Visuals:</b> <a href="#">Pub 4012</a>, Tab F, Deductions, Schedule A - Itemized Deductions</p> <p><b>TaxSlayer Demo:</b> Show Form 1040 entries for income, deduction, and credit information that affect the calculation of the final tax amount.</p>
