

## Lesson Plan

### Dependents

Time Required: 15 minutes

Introduction	Objectives	Topics
Identifying and determining the correct number of dependents is a critical component of completing the taxpayer's return.	Determine if a taxpayer may claim an exemption for a dependent by applying the applicable dependency test	  Dependents Qualifying Child Tests Qualifying Relative Tests Children of Divorced or Separated Parents Entering Dependent Exemptions

### Key Terms

**Dependency Tests:** Tests used for identifying qualifying children or qualifying relatives as dependents.

**Dependents:** Dependents are either a qualifying child or a qualifying relative of the taxpayer. The taxpayer's spouse cannot be claimed as a dependent. Some examples of dependents include a child, stepchild, brother, sister, or parent.

**Exemptions (Personal or Dependency):** The deduction for personal and dependency exemptions is suspended for tax years 2018 through 2025 by the Tax Cuts and Jobs Act. Although the exemption amount is zero, the ability to claim a dependent may make taxpayers eligible for other tax benefits. For example, the following tax benefits may all be associated with a dependent: child tax credit, additional child tax credit, credit for other dependents, earned income credit, dependent care credit, head of household filing status, and other tax benefits.

**Qualifying Child:** To be identified as a qualifying child dependent, a person must meet these tests: U.S. citizen or resident test, Joint return test, Dependent taxpayer test, Relationship test, Age test, Support test, Residency test, and Qualifying child of more than one person test.

**Qualifying Relative:** To be identified as a qualifying relative dependent, a person must meet these tests: U.S. citizen or resident test, Joint return test, Dependent taxpayer test, Not a qualifying child test, Member of household or relationship test, Support test, and Gross income test.
